

I have repeatedly told AMVETS and PURPLE HEART to place my name on their DO NOT CALL list. I still receive a call at least once a month. Can something be done about these people?

In addition, I receive a hang-up call sometimes daily at approximately 10:30am five days a week. It seems to go in spits and starts. It won't happen for about a month and then every morning for a week. I do have caller-ID but I know too many people who work for government agencies whose numbers are blocked so I have to answer these calls anyway just in case.
